Chapter 1

Metal Cutting

1.1 Elements of Machine Tool

-
-

1.2 Metal cutting

-
-

1.3 Terms of Turning tool

-
-

1.4 Nose radius

-
-

1.5 Tool signature

-
-

1.6 Metal cutting process

-
-

1.7 Distribution of Heat

-
-

1.8 Types of chips

-
-

1.9 Merchant's analysis for chip formation

-
-

1.10 Velocity triangle

-
-

1.11 Mechanism of Tool wear

-
-

1.12 Types of tool wear

-
-

1.13 Taylor's tool life equation

-
-

1.14 Effect of parameters on tool life

-
-

1.15 Machinability

-
-

1.16 Measurement of cutting forces

-
-

Chapter 2

Shaping and planning

-

Chapter 3

Grinding

.

Chapter 4

Finishing operations

-

Chapter 5

Drilling

5.1 Introduction

-

5.2 Drill geometry

-

Chapter 6

Boring

.

Chapter 7

Reaming and Reamers

•

Chapter 8

Trepanning

•

Chapter 9

Counter Boring

•

Chapter 10

Counter Sinking

•

Chapter 11

Milling

-

Chapter 12

Jigs and fixtures

-

Chapter 13

Lathes and Lathe operations

-
-

13.1 Principal of Location

-
-
